

LUMOS UV+ POLICE ISSUE DUAL TORCH

Professional Performance LED/UV Torch

Product Code: OT01442

Introduction

The Defender Lumos UV+ is a high performance handheld torch, possessing both a powerful 230 lumens white light and an illuminating 365nm UV LED beam.

Built to the same rigorous standards as the original police-issue Defender Lumos LED, the Lumos UV+ is the perfect all-rounder, with the UV beam detecting SmartWater® and SelectaDNA®.

The high quality performance is complemented by a user-friendly design and grip, along with a uniform-ready Molle pouch and convenient magnetic base for securing the torch in times of need. A built-in lithium battery is easily recharged using the USB input on the bottom of the torch, with a 1m cable also supplied.

Contents

- Handheld LED/UV Torch
- Molle Pouch
- Wrist Strap
- 1m USB Charge Cable

Operation

Both functions are operated using the dual button on the barrel of the torch.

White Light

- From off - Click the button marked 'W' for full brightness at 230 lumens.
 - Click the button marked 'W' a second time for half the brightness at 115 lumens.
 - Click the button marked 'W' a third time to turn the torch off.
- For strobe function - Press and hold the button marked 'W' for 3 seconds to begin strobe*.
- To turn off the white light torch in any mode, single click the 'UV' button.

UV light

- To operate the UV function, press and hold the button marked 'UV'.
- To turn off the UV light, release the 'UV' button entirely.

Note: Operating or single clicking the 'UV' button will turn off the white light operation.

Recharging

The Defender Lumos UV+ has a full recharge time of 4-5 hours. It is recommended that you charge the unit fully before first use. Simply unscrew the cap at the tail end of the torch to reveal the USB connector. Plug the USB connector into the 1m cable provided and connect to the USB port of a charging device. You can also plug the torch directly into a USB charging device. A red light is illuminated under the operation buttons when charging. This light turns green when the torch is fully charged.

Estimated operating time by performance (based on a fully charged torch):

White Light

- 230 lumens: 3 hours
- 115 lumens: 7 hours
- Strobe: 5 hours

UV Light

- On constantly: 3.5 hours
10 lumens or 8000µw/cm² at 38cm

** In accordance with the Health and Safety Executive (HSE) restrictions, the strobe flash rate of the Defender Lumos UV+ is limited to 2 per second. This is below the maximum of 4 per second that the HSE considers appropriate and safe for most people.*

This product has passed testing to globally recognised light and UV exposure conformities under BS EN 62471.

WARNING

Do not look directly into the white or UV light source. Do not point directly into the face of others. Keep away from children.
