

MINI SMART PLUG

Smart, wireless activation device for appliances

Product Code: EL00216

Introduction

The Mini Smart Plug is a high quality wireless smart device which can be used to switch lights and electrical appliances (up to 3120W) on/off automatically and remotely.

Connection

The Mini Smart Plug requires a working 2.4GHz WiFi connection to operate. Download the Smart Life app on your device, available free on both iPhone and Android. Register an account using your email address and follow the on-screen instructions. To add a device, follow on-screen instructions within the app, as also shown below:

SmartLife App icon

1. Tap 'Add Device' or hit the '+' icon in the top right of the screen. In the menu that appears down the left-hand side, choose 'Electrical', then 'Socket (Wi-Fi)'.

2. Enter your Wi-Fi details, ensuring no typos. The 'Reset the Device' screen will appear. Insert the plug into a live socket and wait for the light to start blinking. Press Next.

3. Confirm the light is blinking and press Next.

4. Press and hold the top button for 5 seconds. The light will blink quickly. **Now press and hold the button for another 5 seconds.** The light will blink slowly. Press Next.

5. Choose the 'Blink Slowly' option that appears.

6. Click Go to Connect. You will be directed to your phone Settings; click on the Wi-Fi network containing 'SmartLife'. Once connected, go back to the SmartLife app.

7. The 'Adding Device' countdown will appear and your connection should be complete within 2 minutes.

8. You will see the confirmation screen after successful connection. Name your Smart Plug and click Done.

After Connection, you can start using your device.

The 'edit' symbol in the top right allows you to customise your device, including naming, sharing and smart connections.

The Defender Smart Plugs can be linked to your home's Alexa or Google Assistant system. see Third Party Control in 'edit' for details and setup instructions.

Troubleshooting

- If your device fails to connect, see the FAQ section in 'Me' on the app. Most issues can be resolved by resetting the Smart Plug.
- Within this section you can also edit your notification settings.
- You can connect an unlimited amount of smart plugs to your device.

Operation

Within the app you have three options for operation, as described below.
When the plug is active, the blue LED light indicator will illuminate.

Power	Switch the plug on/off manually by clicking the button in the app.
Timer	Pre-set the plug to turn on/off at certain times. You can set a repeat schedule, receive notifications and add notes. <i>Note: if using this feature to turn appliances on and off at set times, remember to set a corresponding timer for the plug to turn off.</i>
Countdown	Choose a certain timeframe for your plug to change from whatever it's current status is e.g. if your plug is 'On', the plug will turn 'Off' after countdown.

Statement of compliance

The company mandates that, to the best of our knowledge and ability, this item complies with the requirements of the UK Product Security and Telecommunications Infrastructure (Security Requirements for Relevant Connectable Products) Regulations 2023. For more information, contact us via the below.
